Role	**Jr Software Engineer**
Location	Pune
Company Description	Tieto is the leading IT service company in Northern Europe With more than 18 000 experts worldwide providing IT and product engineering services. Their highly specialized IT solutions and services complemented by a strong technology platform provide local and global customers

Product Description	Activate is used to initiate the mortgage loan. It is a client server based desktop application having two-tier Architecture. It captures all the data for client. There are two different projects which are depended on Activate and then process their stages i.e. Summit and AIS. There are 80 stages in Activate and each stage is having certain validation criteria. Based on the functionality it decides whether to proceed further or not. After completion of stage 80 a Mortgage is said to be live and the further process of mortgage monthly repayment is continued. We can change the product even after the application is made live and all new repayment calculation is again made in Activate. This happens more often when banks change their interest rates and Customer want to change the product. There are many other calculation methods for Arrears calculation, redemption calculation. It supports different mortgage like transfer of equity, remortgage, and mortgage variation.
